

Appendix 1. Included studies

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Abderhalden-Zellweger et al 2021 (28)	Kvantitativ	Enkäter: 765 från 202 företag inom livsmedelsindustri och sjukvård.	Schweiz	To assess the implementation of the OProMa regulation and factors that facilitate and obstruct.	Få företag gör riskanalyser eller anpassar arbetet för gravida. Lagen efterföljs i högre grad hos: 1) stora företag, 2) offentlig sektor, 3) om chef /ansvarig fått utbildning. Kraftigare incitament behövs och mer kontroller. Företag behöver ges resurser för att uppfylla lagar och bestämmelser.
Battaglia et al 2015 (57)	Flermetod	Enkäter: 29 Intervjuer: 10 Högre chefer eller arbetsmiljö-ansvariga på kommunala avfallsbolag.	Italien	To analyze the level of maturity of the OHSM system.	Företagens OHS-arbete är tillräckligt och håller en god nivå. Kontroller och revisioner har en bestraffande roll men alla företag ser inte det som en avgörande faktor i OHS-arbetet.
Blanc 2018 (18)	Register-studie	Statistik över arbetsplatsolyckor med dödlig utgång.	Storbritannien, Tyskland, Frankrike, samt EU	To look at what makes effective regulatory delivery.	Fler inspektioner minskar inte antalet olyckor. Effektiv reglering uppnås genom en kombination av insatser.
Borley & Page 2016 (25)	Kvalitativ	Intervjuer: 10 företag inom service, handel och lager.	Storbritannien	To reflect on a current local authority-led regulation model, based on small- and medium-sized businesses views.	Inspektioner som även är råd-/vägledande kan vara till hjälp. Störst drivkraft att följa lagar och regler är rädsla för att hamna i rättstvist samt av moraliska skäl. Främsta hindren är administration och tid (verksamhet prioriteras).
Bunner et al 2018 (59)	Kvantitativ	Enkäter: 63 arbetsmiljöingenjörer och 59 chefer i högriskföretag.	Österrike	Investigate mediating roles of safety climate, -motivation, -knowledge in relation to work intensification.	Arbetsintensifiering är negativt relaterat till säkerhetsefterlevnad medierat av säkerhetsklimat och säkerhetsmotivation. Säkerhetsklimat och kunskap medierar även relationen mellan arbetsintensifiering och följsamhet.
Cajander et al 2023 (52)	Kvalitativ	Intervjuer: 20 chefer, konsultanställda, konsulchefer, experter.	Finland	To explore OSH issues in temporary agency work in small and medium-sized restaurants.	Arbetsmiljöarbete är komplext när flera parter är inblandade. Utmaning och problem för arbetsmiljöarbete vid temporära anställningar, specifikt för restauranger. Även om arbetet är lika så är det svårt att arbeta för en gemensam policy.
Carpio-de Los Pinos et al 2021 (22)	Flermetod	Enkäter: 1 gång/vecka, olika professioner (oklart antal), 1 byggarbetsplats, observation under 34 veckor.	Spanien	To discuss interpretation of the zero-risk concept from a technical-preventive perspective.	Arbetslagarnas uppfattning om säker arbetsmiljö och risker skiljer sig mellan olika aktörer. Arbetslagare skattar risker lägre än utvärderare. Det är svårt att hitta åtgärder eller förebyggande insatser då risker värderas olika.
Cocca et al 2016 (58)	Kvantitativ	Observation: 16 kameror i ett tillverkande företag.	Italien	To gain insights into benefits and drawbacks connected to video technology to improve safety management.	Videoövervakning - ett underlag för riktade utbildningsinsatser. Fördelar: ger tydliga exempel på beteenden, observatören stör inte eller utsätts för risk, möjlighet att observera under längre tid. Nackdel: resurskrävande.
Dahl et al 2022 (70)	Kvantitativ	Arbetsmiljöinspektioner hos 29 224 företag (studie 1); 1119 företag (studie 2); 189 företag (studie 3).	Norge	To investigate the influence of managers' OHS training on safety compliance at the organisational level.	Chefer som får arbetsmiljöutbildning följer regler och rutiner i högre grad, kan påverka på arbetsmiljöinsatser, hur insatser kan påverka produktion och effektivitet. Upprepade utbildningstillfällen har liten effekt på efterlevnad och bör därför ha olika format över tid för att bidra/göra nytta.

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Dahl & Olsen 2013 (69)	Kvantitativ	Enkäter: ca 10 000 anställda på oljeplattformar, 6 måttillfällen.	Norge	How workers' perception of leadership involvement in daily work operations affect safety compliant behavior.	Ledarskapets engagemang har positiv inverkan på säkerhetsnivån (att regler följs) både direkt och indirekt via 1) anställdas kompetens och engagemang, 2) rolltydlighet, 3) uppföljning av tillfälligt anställda.
Dahl 2013 (55)	Kvalitativ	Intervjuer: 24 anställda inom oljeindustri.	Norge	To identify, categorize and gain a comprehension of the most significant factors that affect workers' knowledge of rules and procedures.	Resultatet visar på åtta olika faktorer indelade i tre huvudkategorier: 1) interna, digitala arbetsmiljösystem (tillgång, användarvänlighet, utbildning); 2) arbetsvillkor (rutinarbeten, upplevd risknivå, tillfälligt anställda/konsulter 3) social interaktion (påverkan av/inflytande från chef samt kollegor).
Dahler-Larsen et al 2020 (20)	Kvantitativ	Enkäter: 2 221 arbetsmiljöombud inom offentlig sektor.	Danmark	To compare associations between OHS factors and interventions in the psychosocial domain to the physical work environment.	Studien visar på tre effektiva systematiska arbetsmiljöfaktorer inom fysisk arbetsmiljö: påverkan från skyddsombud och chefer, stöd från ledning, medvetenhet om handlingsplaner. Inom psykosocial arbetsmiljö: samma faktorer plus anonym datarapportering och integrering av organisatoriska processer.
Dellve & Skagert 2024 (50)	Flermetod	Enkäter: 558 (t1) och 206 (t2) chefer. Fokusgrupper: 42 anställda fördelade i 10 grupper, samt 1 fokusgrupp med fackliga, chefer och sjuksköterskor.	Sverige	To identify important conditions for OHSM in work practices in home care and nursing homes, in general and regarding the prevention of the spread of contagion.	Förutsättningar för arbetsmiljöarbete skiljer sig beroende på inställning till äldreomsorg och hemtjänst både innan och under pandemin. Under pandemin förbättrades det systematiska arbetsmiljöarbetet och rutiner, kommunikation kring risker, arbetsanpassning samt jämställdhetsklimat. Ett jämställt klimat, tydliga rutiner, visuella instruktioner, tid för reflektion är stödande för arbetsmiljöarbetet.
Di Tecco et al 2017 (30)	Kvantitativ	Datastyrda telefonintervjuer: 2 984 arbetsmiljöansvariga vid 2 tillfällen (år 2009 och 2014) via ESENER databas.	Italien	Focus on the changed legislation on work-related stress and psychosocial risks.	Resultaten visar att den psykosociala arbetsmiljön förbättrades och arbetsrelaterad stress minskade.
Donati et al 2019 (60)	Kvalitativ	Fokusgrupper: 4 grupper med totalt 19 sjuksköterskor inom intensiv-sjukvård.	Italien	To explore factors that influence intensive care nurses' experiences of being compliant with standard precautions (SP) during emergencies.	Resultatet har tre teman: 1) konflikt mellan rädda patient och att skydda sig själv under tidspress, 2) kompetens, attityd, erfarenhet, 3) arbets- och organisatoriska förhållanden. Finns det tid följs regler. Hur regler och klinisk praxis efterföljs måste följas upp regelbundet, samt behov av information och utbildning.
Edwin et al 2021 (17)	Kvalitativ	36 representanter i bygg- och oljebranschen (myndigheter, arbetsgivarorganisationer, företag, chefer, arbetsmiljöansvariga).	Norge	To explain factors behind the differences in the number of occupational fatalities of the two identified Norwegian industries.	De två branscherna har olika regelverk (hav/land) med olika skadestatistik där betydligt fler olyckor sker i byggbranschen. Oljebranschen ses som mer "mogen" säkerhetsmässigt, pga. olyckor som ledde till regelskärpningar samt mer standardiserat arbete medan bygg strävar efter minimistandard i följsamhet.
Evans & Silbey 2022 (26)	Kvalitativ	Intervjuer: 33 samt observationer.	Storbritannien	How professionals deploy their expertise to manage risk while routinizing legal and organizational control.	Regler tillämpas selektivt av forskarna i laboratorium – vissa följs till fullo, andra följs selektivt blandat med professionellt omdöme från fall till fall. Bygger på egna riskbedömningar där regler är underordnat professionell expertis.

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Farina et al 2016 (48)	Register-studie	574 inspektioner och olycksfri tid.	Italien	To investigate which inspection leads to the prevention of injuries.	Visar på samband mellan mer omfattande inspektioner och längre olycksfri tid. Mer omfattande inspektioner ger en preventiv effekt över tid.
Finnanger et al 2022 (44)	RCT	Enkät: 1 grupp får inspektioner, 1 grupp får rådgivande workshops, 1 kontrollgrupp.	Norge	Effect of inspections and guidance through workshops on psychosocial and biomechanical work factors.	Tillsyn verkar ha liten eller ingen påverkan på psykosociala och biomekaniska risker. Rådgivningsstrategin uppvisar större skillnad jämfört med kontroller för de psykosociala riskerna, men sambandet är inte signifikant.
Hagqvist et al 2020 (40)	Kvalitativ	Intervjuer: 11 inspektörer på Arbetsmiljöverket, fokus på mikro-företag (upp till 9 anställda).	Sverige	OSH inspectors' views of micro-enterprises and OSHM and inspectors' experiences of inspections.	Regelverk och sanktioner är inte riktigt anpassade efter småföretag. Det råder bristande kunskap om lagar och regler bland företagarna. Det är tydligt att entreprenörer och byråkrater kommer från helt olika världar.
Hagqvist, et al 2021 (41)	Kvalitativ	Intervjuer: 11 inspektörer på Arbetsmiljöverket, fokus på mikro-företag (upp till 9 anställda).	Sverige	How OHS inspectors perceive themselves and their role as bureaucratic regulators.	För inspektörer är det utmanande att upprätthålla byråkratiska krav vid inspektioner. De måste balansera byråkratisk roll mot att utbilda och motivera. Bättre stöd behövs för att utveckla modeller för småföretag.
Hohnen & Hasle 2018 (37)	Kvalitativ	Intervjuer: 5 certifierare samt observation av inspektioner. Intervjuer med ledning och arbetsmiljöombud före och efter inspektion på 4 kommunala arbetsplatser.	Danmark	How audits are carried out in practice within the area of psychosocial work environment.	För inspektörer är det utmanande att upprätthålla byråkratiska krav vid inspektioner. De måste balansera byråkratisk roll mot att utbilda och motivera. Bättre stöd behövs för att utveckla modeller för småföretag. Psykosociala risker behandlas inte i tillräcklig utsträckning i ackreditering, revisioner eller på arbetsplatser. Inspektörer är ofta osäkra på hur de ska undersöka och hantera detta.
Jain et al 2022 (31)	Register-studie	Enkätdata från två databaser: ESENER (n: 35 765) och EWCS (n: 24 702).	Europa	If legislation on psychosocial risks and stress is related to action plans to prevent stress and in better psychosocial working conditions and less stress.	Nationell lagstiftning är förknippad med fler företag som har handlingsplaner för att hantera arbetsrelaterad stress. Sådana planer har även ett samband med ökade resurser men inte minskade krav. Samband finns mellan resurser och lägre rapporterad stress via organisatoriska handlingsplaner.
James et al 2015 (24)	Kvalitativ	Intervjuer: 37 personer från olika hierarkiska nivåer i organisationen samt gruppdiskussioner (ett företag med kontrakt på två olika byggarbetsplatser).	Storbritannien	To assess the impact of the supply chain strategies of procurers on occupational health and safety management and performance among their contractors.	Detaljerade krav, stöd till underleverantörer. Uppföljning och tillsyn via interna system. Inga regelrätta inspektioner men krav på regler så interna system utvecklas och upprätthålls. Regler omsätts till säkerhetsrutiner genom hela leverantörskedjan. En kombination av externt tryck (lagar, regler) och internt ("god praxis").
Jespersen et al 2016 (38)	Kvalitativ	Intervjuer: 6 certifierare, 2 chefer inom äldreomsorg, observationer, dokumentanalys.	Danmark	How certified organizations transform general audit guidelines into internal audit practices covering psychosocial risks.	Svårt att omvandla allmänna riktlinjer till praktiska modeller vilket leder till variationer i revisionspraxis. Psykosociala risker kräver andra metoder och kompetens jämfört med traditionell säkerhet vilket inte OHSAS 18001 tar hänsyn till.

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Johannessen et al 2022 (43)	RCT	Enkäter: 221 chefer, arbetar-representanter, skyddsombud inom hemsjukvård.	Norge	If inspections and guidance through workshops are equally useful and educational, if managers in the intervention groups to a greater extent reported implementing measures to avoid risk factors.	Båda interventionsgrupperna upplevde hög nivå av upplevd användbarhet, ökad kunskap. Högre grad av genomförda eller planer på att genomföra åtgärder av chefer som genomgick workshops. Rådgivningsstrategin uppvisar större skillnad jämfört med kontroller för psykosociala risker men sambandet är inte signifikant.
Koppel & Vilcane 2018 (34)	Kvantitativ	Enkäter: 190 arbetsmiljöspecialister, anställda, företagsläkare och inspektörer inom olika branscher.	Estland	To determine the compliance of companies and the respective stakeholders with respect to the new EMF safety legislation.	Specialister skattar säkerhet högre än anställda och inspektörer. Viktigaste påverkansfaktorn på elektromagnetisk säkerhet var utbildning för specialister och för anställda. Brister var mer förekommande i mindre företag.
Kvalheim & Dahl 2016 (53)	Kvantitativ	Enkäter: 31 350 till anställda inom olja- och gasindustri, 4 måttillfällen.	Norge	To perform multiple tests of the causal relationship between safety climate and safety compliance.	Säkerhetsklimat förklarar en tredjedel av skillnaden i säkerhetsöverensstämmelse. Utbildning är mest effektivt för att förbättra följsamhet, skapa sund balans mellan säkerhet och produktion.
Larrieta-Rubín de Celis et al 2017 (65)	Kvantitativ	Enkäter: 117 företag inom olika branscher.	Spanien	To propose an approach based on CSR and OHS, and a gender perspective on OHSM.	Genus tas "måttligt" i beaktande, företag har olika grad av intresse för jämställdhet. Studien visar att lagar efterföljs, det är viktigt att visa att man arbetar aktivt med genus när det gäller arbetsmiljö.
Leka et al 2023 (32)	Registerstudie	Enkätdata från två databaser: ESENER (n: 1 656) och EWCS (n: 494).	Italien	The relationship between key OHS policy principles and organizational action on work-related stress.	Samband mellan organisatoriska policys och åtgärder mot arbetsrelaterad stress. Lagstiftning om psykosociala risker är nödvändig. Organisatorisk arbetsmiljökultur kan ha positiv effekt på organisationers arbetsmiljöarbete.
Lenhardt & Beck 2016 (21)	Kvantitativ	Enkäter: 6 500 företag i olika branscher.	Tyskland	Prevalence of WRA's, different WRA-related activity patterns that indicate variations in the quality of implementation, organisational factors.	Ett av fyra företag som genomför riskbedömningar och som uppfyller nödvändiga krav tar även hänsyn till potentiella riskområden på ett mer övergripande sätt. Företagsstorlek är den överlägset starkaste prediktorn för riskbedömningar. För bättre resultat krävs mer kontroll och rådgivning (främst små företag och privat tjänstesektor).
Löfquist et al 2017 (63)	Kvalitativ	Intervjuer: 16 chefer, medarbetare och ingenjörer inom olja- och gasindustri.	Norge	How management, engineering, and operations culture make sense of safety rules, and differences in interpretation.	Olika tillvägagångssätt för att tolka och förstå säkerhetsregler: ledning som prestation; ingenjörer som process; verksamhet som handling. Ledning vill se ökat individuellt ansvar, enklare regler. Ingenjörer vill se toppstyrning. Arbetare följer regler men slits mellan följsamhet och praktik.
Martínez-Aires et al 2016 (27)	Kvalitativ	Intervjuer: 60 Fokusgrupper: personer inom bygg och relaterade yrken.	Spanien och Storbritannien	To analyze the influence of European Union Directive 92/57/EEC on OHS injury prevention in the project design phase.	Regelverket har förtydligat skyldigheter för projektledare och samordnare. Störst skillnad mellan 92/57/EEC och nationella regler som kan påverka Prevention genom design (PtD) är kopplade till arbetsmiljösamordnare och arbetsmiljödokument.
Martínez-Córcoles & Stephanou 2017 (66)	Kvantitativ	Enkäter: 161 fallskärmsjägare.	Grekland	To analyze how overall active transactional leadership affect safety performance behaviors.	Transaktionellt ledarskap påverkade fallskärmsjägares prestation genom säkerhetsklimat, vilket fungerade som en mediator mellan belöning och prestation.

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Morillas et al 2013 (23)	Flermetod	Registerdata från Eurostat (2004-2009): 14 företag. Intervjuer: arbetsmiljöansvariga, enkäter dokumentanalys. Delphi-studie, enkäter: arbetsmiljöexperter (4 spanska, 3 svenska).	Sverige och Spanien	To reduce workplace accidents and to improve OHS management in Spain by exploring the OHS practices in Sweden.	Korrekt utfört arbetsmiljöarbete bidrar till förbättrade arbetsförhållanden och färre olyckor. Spanien: Mer samarbete behövs mellan olika aktörer, integrera ansvar för att undvika att det bara blir ett utbyte av olika dokument.
Mustchin & Lucio 2023 (49)	Kvalitativ	Intervjuer: 35 inspektörer, myndigheter, fack, tillsynsorganisationer, arbetsgivarorganisationer.	Storbritannien	The impact of regulatory and organisational change on individuals responsible for direct enforcement of employment regulation.	Resultatet visar att åtstramningar ger sämre förutsättningar för tillsyn och för inspektörers kompetensförsörjning, vilket gör det svårare att säkerställa att arbetsgivare uppfyller lagkrav.
Nielsen 2017 (42)	Flermetod	Enkäter: 25 inspekterade företag inom byggbranschen. Observationer: 25 Intervjuer med inspektörer.	Sverige och Danmark	To describe and compare the inspection practices, within the construction industry, between the Danish and Swedish Work Environment Authorities.	Inspektioner ger direkt påverkan på arbetsplatsers arbetsmiljöarbete: tillsyn påverkar följsamhet. Mer stödande strategier tas emot bättre. Den svenska praktiken är mer rådgivande än den danska, vilket skulle kunna innebära bättre förutsättningar för följsamhet i Sverige.
Niskanen 2015 (46)	Kvalitativ	Enkät: 229 inspektörer, kvalitativ analys av öppna svar.	Finland	Ex-post evaluation of the OSH Enforcement Act. Views of OHS inspectors.	En spänning mellan kvantitativa krav på antal inspektioner och hur effektiva de är. Inspektioner skulle behöva harmoniseras mer.
Niskanen et al 2014 (45)	Kvantitativ	Enkäter: 120 skyddsombud och 85 arbetsmiljöansvariga inom kemikalieindustrin.	Finland	Investigate effects of administrative supervision of OHS inspectors in the workplaces that they inspect.	Skyddsombud ser tydligare koppling mellan lag, inspektion och effekt än arbetsmiljöansvariga. Mer uppföljning, rådgivning och information önskas. Lagar är för generiska. Enligt skyddsombuden leder inspektioner till olika resultat, medan arbetsmiljöansvariga fokuserar mer på kompetens (att utföra inspektioner) som leder till bättre effekt.
Niskanen et al 2014 (19)	Kvantitativ	Enkäter: 120 skyddsombud, 85 arbetsmiljöansvariga inom jord-/ skogsbruk, bygg, transport, handel, hotell, restaurang, vård/ omsorg, regionala och nationella förvaltningar eller myndigheter.	Finland	OHS inspectors' views on the Enforcement Act, how effectiveness of OHS enforcement can be improved.	Skyddsombud har större förtroende för lagstiftningens effekter jämfört med arbetsmiljöansvariga. De flesta utfall kan kopplas till lag, ledning och samverkan.
Niskanen et al 2016 (51)	Kvantitativ	Enkäter: 120 skyddsombud och 85 arbetsmiljöansvariga inom kemikalieindustrin.	Finland	Interconnected frameworks of system thinking between micro-, meso- and macro-levels (OHS).	Mikro-, meso- och makronivå påverkar varandra inom ett system. Utfall på mikro- och mesonivå är relaterat med faktorer som utbildning, kvalitet på företagshälsovård och lagstiftning.
Przystupa et al 2019 (33)	Kvantitativ	Enkäter: 100 yrkeschaufförer.	Polen	If and how legal acts regulating drivers' working time are respected and manipulation of working time.	Studien visar att lastbilschaufförer ofta manipulerar sina arbetstider och körmanualer (mätning av tid och körsträcka). Lagar och regler anses krångliga och "stör" hur de kan utföra sitt arbete

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Rasmussen et al 2014 (62)	Kvalitativ	Intervjuer: 14 arbetsmiljöombud, 10 chefer och medarbetare inom arbetsmiljöavdelningar, 54 chefer och medarbetare från andra avdelningar inom olja- och gasindustrin Observationer: 18 OHS-möten Workshop: 4 timmar.	Danmark	How safety representatives develop a role that create necessary recognition from management in daily practice.	Då lagtexten är bred resulterar det i olika bild av vad arbetsmiljöombud ska göra, och de måste navigera mellan olika intressenters förväntningar och blir problemlösare snarare än strategiska partners. arbetsmiljöombud bör tillvaratas bättre i arbetsmiljöarbetet.
Schenk & Antonsson 2015 (35)	Kvalitativ	Intervjuer: 19 professionella, anställda och myndigheter.	Sverige	How Swedish OELs and worker DNELs are perceived, whether worker DNELs are considered a possible alternative to OELs when the latter are lacking.	Främst används svenska gränsvärden för exponering (OEL) och verktyg för riskhantering. En tredjedel hade erfarenhet av kemiska ämnen utanför svenska gränsvärden. Hälften kände inte till EU:s guide med gränsvärden (worker DNEL). Det finns ett behov av utbildning om DNEL och verktyg som underlättar där svenska gränsvärden saknas eller inte är tillämpbara.
Schmidt et al 2017 (67)	Kvalitativ	Intervjuer: 100 politiker, chefer, HR-representanter, arbetsmiljöombud, företagshälsovård, samt fokusgrupper.	Sverige	To explore how public sector organizations utilized services and support from their OHS provider in preventive OHSM.	Företagshälsovård tillhandahåller inte det preventiva arbetsmiljöarbete på det sätt som regelverken avser. I stället utgör HR en viktig roll för samordning och nyttjande av resurser för arbetsmiljö då de ofta agerar mellanhand eller grindvakt mellan verksamheter och företagshälsovård.
Schuller 2020 (56)	Kvalitativ	Intervjuer: 34 företag inom olika branscher.	Tyskland	Explore barriers that hinder development and implementation of OHS measures, causes and attempts to overcome them.	Hindrande barriärer är komplexa psykosociala risker; brist på övertygelse; utrymme att undvika risker; bristande ansvarstagande; diskrepans mellan formellt ansvar och befogenhet; låg reflexivitet på utveckling och implementering.
Simpson et al 2024 (36)	Flermetod	Intervjuer: 23 chefer inom träarbete, fysisk mätning.	Storbritannien	Develop a better understanding of factors that may influence organisational practices in relation to the control of wood dust exposure.	Två centrala faktorer lyfts fram för efterlevnad av regelverk: ekonomiska förutsättningar, samt medarbetares efterlevnad av instruktioner och säkerhetsbeteenden (hur chef upplever medarbetare lyssnar, följer instruktioner och rutiner).
Sjöberg Forssberg et al 2022 (64)	Kvalitativ	Intervjuer: 10 inspektörer och chefer på Arbetsmiljöverket.	Sverige	To critically examine and explain systematic OSHM procedures in gender-segregated work environments.	Arbetsmiljöarbetet är otillräckligt avseende riskbedömning, incidentrapportering, dokumentation, systematik, kunskap och kompetens. Arbetsmiljön begränsar möjlighet till arbetsmiljöarbete liksom olika lojaliteter, identiteter, och kultur.
Størkersen et al 2023 (61)	Kvalitativ	Intervjuer: 11 arbetsmiljökonsulter inom olje- och gasindustrin.	Norge	Seafarers' and fishers' perspectives on safety management requirement, future development of safety management.	Arbetsmiljökonsulter utför inte bara de riskbedömningar de blivit anlitade för, utan agerar även bollplank för att få en säker arbetsmiljö och inte bara uppfylla lagkrav.

Författare	Design	Population	Land	Syfte (som uttryckt i studien)	Resultat
Sønderstrup-Andersen & Bach 2018 (71)	Kvantitativ	Enkäter: 6 423 organisationer.	Danmark	If recession had an impact on companies' and public institutions' preventive OHS activities.	Det psykosociala preventiva arbetsmiljöarbetet ökade medan det förebyggande arbetsmiljöarbete mot arbetsplatsolyckor och den fysiska arbetsmiljön minskade.
Tappura et al 2017 (68)	Kvalitativ	Intervjuer: 49 chefer i 5 olika industriföretag.	Finland	Identify organisational factors that hinder or promote managers' commitment to safety, suggest organisational measures that support managers' commitment to safety.	Hindrande faktorer: överbelastning i chefsuppdraget, produktionskrav, formella säkerhetsrutiner, externa säkerhetsmål, medarbetares och chefers attityder. Organisatoriska åtgärder för att stödja chefers engagemang: ledar- och säkerhetsutbildning, stöd från chefskollegor och ledning, förenklade rutiner och rapportering
Tatsaki et al 2019 (72)	Registerstudie	Grekisk nationell skadestatistik.	Grekland	The relationship between occupational accidents, GDP, and sanctions imposed by the Greek Labour Inspectorate.	Statistiskt samband mellan BNP, tillsynssanktioner och arbetsplatsolyckor. När BNP minskar, minskar även mängden arbete i farliga miljöer och därmed tillsynssanktioner. Tillsynsmyndigheter bör agera tidigt med preventiva tillsynsåtgärder när BNP börjar stiga, inte invänta ökning av arbetsplatsolyckor.
Uhrenholdt Madsen et al 2022 (39)	Kvantitativ	Enkäter: 630 certifierade, 1917 ej certifierade.	Danmark	Investigate differences in OHS efforts between adopters and non-adopters of COHSMs.	Organisationer som är certifierade har generellt bättre arbetsmiljöarbete sett till både process (organisering, system) och innehåll (faktiska insatser) men variation finns inom de certifierade.
van Beukering et al 2022 (29)	Kvantitativ	Enkäter: 269 gravida kvinnor i olika branscher.	Nederländerna	To examine adherence to legislation and guidelines aimed at improving working conditions in pregnancy.	Många arbetsgivare gör inte anpassningar vid graviditet enligt lag. Låg utbildning, arbete inom vård/omsorg, skola, catering, industri, bygg, städ är riskfyllt arbete. De mest förekommande riskerna är att stå/gå mer än 4 h/dag, ofta böja sig, fysiskt krävande arbete.
Weissbrodt et al 2018 (47)	Kvantitativ	Enkäter/strukturerade intervjuer: 346 företag (185 inspekterade av arbetsmiljöinspektörer).	Schweiz	Effects of inspection visits at company level, a survey conducted in two groups of companies.	Företag som blir inspekterade av en arbetsmiljöinspektör uppvisar större riskmedvetenhet och arbetsmiljöarbete jämfört med företag som ej blivit inspekterade, särskilt större organisationer
Winge et al 2019 (54)	Kvalitativ	Intervjuer: 22 projektledare och arbetsmiljöinspektörer inom bygg.	Norge	Safety management factors, contextual factors and combinations of such factors connected to safety performance.	Projekt med bättre säkerhetsprestation har mer integrerat säkerhetsarbete. Där säkerhetsarbetet är komplext fungerar de observerade faktorerna som koordinerande. Vissa faktorer identifieras som nödvändiga (t ex. roller, ansvar, ledning, integration, lärande säkerhetsklimat, riskhantering).

Appendix 2: Quality review

	1. QUALITATIVE STUDIES				
Citation	1.1. Is the qualitative approach appropriate to answer the research question?	1.2. Are the qualitative data collection methods adequate to address the research question?	1.3. Are the findings adequately derived from the data?	1.4. Is the interpretation of results sufficiently substantiated by data?	1.5. Is there coherence between qualitative data sources, collection, analysis and interpretation?

	2. RANDOMIZED CONTROLLED TRIALS				
Citation	2.1. Is randomization appropriately performed?	2.2. Are the groups comparable at baseline?	2.3. Are there complete outcome data?	2.4. Are outcome assessors blinded to the intervention provided?	2.5 Did the participants adhere to the assigned intervention?
Finnanger et al., 2022	Yes	Yes	Yes	Can't tell	Yes
Johannessen et al., 2022	Yes	Yes	Yes	Can't tell	Yes

	3. NON-RANDOMIZED STUDIES				
Citation	3.1. Are the participants representative of the target population?	3.2. Are measurements appropriate regarding both the outcome and intervention (or exposure)?	3.3. Are there complete outcome data?	3.4. Are the confounders accounted for in the design and analysis?	3.5. During the study period, is the intervention administered (or exposure occurred) as intended?
